competition	
40 Graphic	A Training Manager for the WorldSkills Graphic Design competition would
Design Technology	need a range of specialist technical skills, including:
	1. Mastery of industry software such as Adobe Creative Suite
	(Photoshop, Illustrator, InDesign, etc.) for both print and digital design.
	Design expertise to train high levels of expertise in typography, layout, colour theory, and branding.
	3. Awareness of the latest design trends, tools, and emerging technologies, ensuring that training remains current and relevant.
	4. Commercial awareness and understanding to train and coach
	students and apprentices how to present design concepts effectively and communicate with clients to meet their needs.
	5. Problem-solving for troubleshooting design and software issues.
	 Innovative design abilities for creating interactive and animated elements.
	7. Technical knowledge of print and digital outputs, file formats, and image manipulation.
